

Company profile

barbagli
Metering innovation

Who we are

Barbagli is a metering company, specialized in providing solutions for the acquiring, monitoring and management of water, gas, electric energy and heat consumption.

We offer a vast selection of services and cutting edge technologies for utilities, real estate owners and managers.

The company's steady trend towards growth is ensured by a highly select staff and by the latest technical solutions in our field, combined with eighty years plus of experience in metering activities.

Founded in 1923 as a shop for the repair and sale of meters, since the start of the new millennium Barbagli has formulated a growth plan that has enabled us to increase the scope of our offerings and address a wider gamut of markets.

Today Barbagli is a qualified partner for the European utilities, the real estate managers and for property owners.

Mission

Offering an assortment of superlative services that puts to use the most innovative technologies in metering and billing.

Providing services that are developed on our customers' specific needs.

Pursuing with determination and efficiency our clients' thorough satisfaction.

Our trademark range of technologically advanced services is accompanied by the impeccable courteousness, professionalism and competence of our employees, always committed to delivering all-around excellence for our clients.

certified quality system
ISO 9001:2000

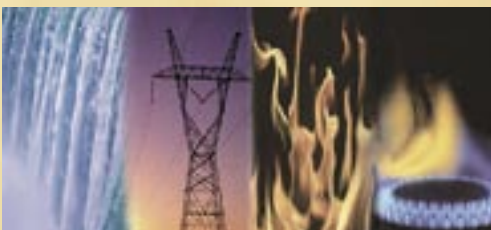

Utilities services

In an increasingly competitive utilities market scenario, only providing consistently excellent solutions can guarantee the complete satisfaction, trust and loyalty of our customers. Barbagli supports utilities with services aimed at bettering the management of critical activities in metering and billing and field operation.

Our expertise is the result of substantive investments in research and development and years of hands-on experience in the field.

The wide range of solution is composed by: service and technologies for meter reading and field operation management, AMR technologies and service provider. Barbagli provides a top level range of services that has been taken to example by many of Italian leading companies in the metering and billing sector.

Residential services

In the residential market, Barbagli offers “sub-metering” solutions for effectively managing energy consumption within apartment buildings and other forms of real estate, such as: shopping centers, campings and residential complexes, guaranteeing comfort, independence and tranquility. Real estate managers, thermohydraulic companies, engineers, construction companies and energy suppliers will all find Barbagli to be a reliable partner, well-equipped to serve and satisfy their clients with innovative, personalized solutions that successfully address the complexities of energy consumption, its management and its metering.
